

## Special Session: Resilient Remanufacturing for Circular Economy

16<sup>th</sup> – 18<sup>th</sup> May 2018  
Stockholm, Sweden

To cope with the growing concerns of limited natural resources, sustainability, and the increasingly stringent legislation on industrial pollution and other environmental issues, remanufacturing has recently emerged as a viable approach of international importance in the US, China and Europe to drive sustainable manufacturing, promote conservation and more comprehensive utilization of energy and resources, and drive the business and society to embrace circular economy. Not only because remanufacturing offers feasible product options using substantially less energy and material, which leads to a significant reduction in production waste and pollution, it also creates job opportunities that contribute to a much wider social-economic terms. Hence, active research programs funded by different government agencies and industry sectors have been carried out focusing on a number of relevant topics, from product design for remanufacturing, advanced remanufacturing process, robotics in remanufacturing, resilient remanufacturing networks, and so on.

This special session invites academics, researchers and practitioners to bring original studies that report the latest advancement in remanufacturing and the development of efficient and resilient remanufacturing systems, such as closed-loop supply chains, in different industry sectors.

### Submission Instructions

Please submit your abstract and full paper directly through the Elsevier Editorial System (EES) website (<http://ees.elsevier.com/procir/default.asp>). Information about paper format (template) and submission guidelines can be found at <https://www.cirp-cms2018.org/submission/>. Potential authors are encouraged to contact special session organizers first before abstracts are submitted.

### Publication Target Dates

Indication of contribution to organizers: 30<sup>th</sup> Sep, 2017

Abstract submission: 31<sup>st</sup> Oct, 2017

Acceptance of abstract: 15<sup>th</sup> Nov, 2017

Full paper submission: 31<sup>st</sup> Dec, 2017

Papers submitted will be reviewed by the CMS2018 Scientific Committee. Early submission is encouraged.
