

Special Session: Smart and Evolvable Production Systems

16th – 18th May 2018
Stockholm, Sweden

The operation environment of today's manufacturing companies is quickly evolving. Only thing that is evident is change. To survive in such a dynamic and versatile environment, the production systems need to be able to adapt rapidly to different requirements based on the demand. Modular, easily reconfigurable systems with standardized interfaces, have emerged to answer to this requirement. This special session collects contributions proposing new methods and approaches supporting the design, management and control of modular, plug-and-produce and reconfigurable and/or evolvable production systems. Particular emphasis will be given to the design and deployment of these systems, and future actions to increase the level of intelligence and autonomy of the systems and design itself.

Submission Instructions

Please submit your abstract and full paper directly through the Elsevier Editorial System (EES) website (<http://ees.elsevier.com/procir/default.asp>). Information about paper format (template) and submission guidelines can be found at <https://www.cirp-cms2018.org/submission/>. Potential authors are encouraged to contact special session organizers first before abstracts are submitted.

Publication Target Dates

Indication of contribution to organizers: 30th Sep, 2017

Abstract submission: 31st Oct, 2017

Acceptance of abstract: 15th Nov, 2017

Full paper submission: 31st Dec, 2017

Papers submitted will be reviewed by the CMS2018 Scientific Committee. Early submission is encouraged.
